CRISTIAN JAVIER VELASCO BURBANO

San Juan de Pasto, Colombia | velascoburbanocristian@gmail.com | github.com/CV17d

EDUCATION

Universidad Cooperativa de Colombia (UCC) *Present*

Software Engineering | San Juan de Pasto, Colombia

- **Languages:** English Level B1 (SENA Certification) with all 4 university academic levels completed and passed.
- **Academic Achievements:** Active participation in 3 AI and technology Hackathons; attended 4 Software Engineering Seminars organized by UCC.

Coderhouse & SENA *Remote*

Technical and Product Certifications

- **Coderhouse:** Product Manager, Product Marketing, Customer Experience, Inbound Marketing, Community Manager, and Advertising.
- **SENA:** Applied Electronics and Robotics, Innovation and Entrepreneurship.

EXPERIENCE

Freelance Full-Stack Developer *Jan 2024 - Present*

Independent | Remote

- Led the end-to-end development of Nutriweb, a web system for clinical onboarding and scheduling, achieving automated patient management and online subscription sales by integrating Next.js 16, React 19, Supabase, and SST Ion on AWS.
- Optimized residential energy consumption by creating GridMind (IoT), providing AI recommendations and billing reports through custom IoT hardware, a scalable backend, and a mobile interface.

PROJECTS

Rutea Pasto (Public Transport Telemetry)

React Native, NestJS, PostGIS

- Developed a collaborative tracking system for public transportation, projecting estimated times of arrival (ETA) and exact route positions, implementing WebSockets and anti-spoofing algorithms.

Demencia No Límite (FPS Video Game)

Unity 3D, C#

- Created a psychological horror roguelike with procedural generation of 30 levels, delivering a gameplay experience with dynamic difficulty and mental degradation, programming an AI Director and bosses with inverse scaling.

OptiFlow (Ergonomic Health Software)

Electron, React, Python, OpenCV

- Improved users' visual health during prolonged screen sessions by processing 468 facial landmarks in real-time locally, orchestrating a biometric engine in Python with a native cross-platform desktop interface.

OmniRoute (Standalone App for Wearables)

Wear OS, watchOS

- Streamlined delivery drivers' logistics by reducing interactions to 3-5 seconds, ensuring offline availability and immediate confirmations, building native clients with Room, WorkManager, and Retrofit without relying on a smartphone.

TECHNICAL SKILLS

- **Frontend & Mobile:** Next.js 16+, React 19, React Native (Expo), Tailwind CSS, Native Wind, SwiftUI.
- **Backend & Cloud:** NestJS, Spring Boot, Supabase, SST Ion (AWS).
- **Databases & GIS:** PostgreSQL, PostGIS, Room (SQLite).
- **Development & Engines:** Electron, Unity 3D, Kotlin (Compose), C#.
- **Productivity & AI:** Cursor, Claude, Antigravity (Code and architecture enhancers).
